

A Solid Base To Build Upon

A 'New' Solution to An 'Old' Problem

Genesis

Quick Start Program

only
\$199,000

In Stock and Currently Available for Fast Delivery

Doing your own set-ups? You may attend auctions to find the best used machine you can, then start the tooling process on a inappropriately equipped Hydromat with degraded hydraulics and questionable electronics. You may get some components you won't need, and are missing many you do. That's the 'Old' Problem we're talking about. The 'New' Solution is the Genesis Quick-Start Program, everything you need to begin your project on solid footing.

The Genesis is a 12 Station Core Machine of all new components that will kick start getting your machine in production with no worries. Add your own toolspindle units, collets and tooling, or contact the Hydromat Customer Service Department for all the parts you need to complete the project.

The Genesis offers the classic Hydromat Rotary Transfer configuration in a newly manufactured machine. A new machine that has a proven history of accuracy and durability built right in.

Machine Specifications

- HW 25-12 Basic Machine w/Control Pivot
- Electric Control Cabinet w/G.E. 90-30 PC
- Pendant Arm w/Quick Panel Jr. Touch Screen Operator Control
- Hydraulic Power Pack-20gal
